

**THE INDIAN SCHOOL TEAM**

**Presents**

**CITYOS**

*Smarter city, seamless life*

# VISION OF CITYOS

EFFICIENT. TRANSPARENT.  
SUSTAINABLE.

- Digital citizen platform for smarter urban living.
- Helps understand utility bills and manage public services.
- Enables reporting of civic issues directly to authorities.
- Suggests cleaner and eco-friendly travel routes using real-time data.
- Encourages participation in environmental and community initiatives.
- Powered by IoT, Big Data, GPS, GIS and e-Governance for intelligent city management.
- Connects urban services to solve everyday city challenges efficiently.

# CORE PLATFORM MODULES

## SIX KEY PILLARS

### AI ELECTRICITY BILL ANALYSER

AI-driven analysis of consumption patterns, cost breakdowns, and savings recommendations.

### CMIC GRIEVANCE & AI HUB

Digital complaint filing with GPS location capture, tracking, and official documentation.

### CARBONQUEST LEAGUE

Gamified sustainability challenges rewarding walking, planting, and clean-up actions.

### AIRROUTE AI PATH PLANNER

Finds cleanest-air routes for walking and cycling using live AQI and environmental data.

### ECO3D MAP

Real-time GIS digital twin for urban monitoring, citizen tasks, and spatial engagement.

### MODULE COVERAGE

Energy · Governance · Transportation  
· Sustainability

These four interconnected modules form the operational core of CityOS, uniting AI, GIS, live data, and citizen participation across every urban domain.

# AI ELECTRICITY BILL ANALYSER

CityOS simplifies complex electricity bills using AI — empowering citizens to understand consumption, cut costs, and make smarter energy decisions at home.

## SMART ENERGY INTELLIGENCE FOR EVERY HOUSEHOLD

### COST BREAKDOWN

Breaks down your electricity bill into itemized components for full transparency.

### USAGE PATTERNS

Identifies peak consumption periods and behavioral trends using AI analysis.

### SAVINGS RECOMMENDATIONS

Generates actionable, personalized suggestions to reduce monthly electricity costs.

# STEP-BY-STEP PROCESS

# STEP-BY-STEP PROCESS

**The AI-powered parsing engine extracts consumption data, cost breakdowns, and usage patterns to deliver actionable savings recommendations instantly.**

## AI ELECTRICITY BILL ANALYSER

Upload any Indian household electricity bill PDF or image. Our AI deeply parses down spikes, and projects standard vs. saving-assisted consumption.

STATE & UTILITY PROVIDER SETUP

ANALYZE BILL WITH GENAI

# ELECTRICITY BILL ANALYSER — OUTPUT

- Usage Insights — Detailed breakdown of consumption patterns by appliance and time period.
- Visual Graphs — Interactive charts showing daily, weekly, and monthly usage trends.
- Savings Recommendations — AI-generated tips to reduce costs based on your specific usage profile.
- Preventive Measures — Practical steps to avoid peak-hour charges and optimize energy use.

CityOS goes beyond basic bill reading — delivering actionable intelligence that empowers citizens to cut costs and reduce energy waste.

# CIVIC GRIEVANCE & AI GENERATOR HUB

## COMPLAINT CREATION

File structured civic complaints for public issues with AI-assisted documentation.

## LOCATION CAPTURE

Pinpoints exact issue location via GPS for accurate, verifiable grievance reporting.

## TRACKING & DOWNLOAD

Track ticket status, download complaint copies, and generate official government emails.

OFFICIAL FILING RECEIPT

CIVIC REDRESSAL FILING

ID: COMP-2026-9893 • SLA Priority: High

RECIPIENT SMTP:

commissioner@bbmp.gov.in

CITY PORTAL REGISTRY ROUTE

CITIZEN FILER:

()

GIS MATRIX:

Lat: 12.9716° N, Lng: 77.5946° E

DEPT ASSIGNMENT:

Engineering & Infrastructure Division (BBMP)

EMAIL SUBJECT DRAFT:

URGENT CITIZEN REMEDY: AI-Verified High Priority - Roads & Potholes at Residency Road

AI GENERATED DRAFT:

Dear Commissioner,  
  
RE: AI-EXTRACTED CIVIC HAZARD NOTIFICATION (BBMP)  
  
This is an automated formal complaint compiled by the Smart Citizen Hub. Computer vision scanning models have validated that this visual representation constitutes a "Roads & Potholes" of severity level "High".  
  
The GPS telemetry maps exactly to Coordinates [Lat: 12.9716, Lng: 77.5946]

SAFETY ADVICE:

Caution: Vehicles should decelerate immediately to avoid axle fractures.

SYSTEM AUTHENTICATION SIGNATURE

SIMULATE EMAIL

The Grievance Hub empowers citizens with faster, structured, and official reporting channels — bridging the gap between urban issues and government response.

# GRIEVANCE HUB KEY FUNCTIONS

These six functions streamline civic grievance reporting, ensuring faster resolution and transparent communication between citizens and government.

## FILE COMPLAINTS

Report civic and public issues digitally with structured, official documentation.

## LOCATION VERIFICATION

Confirm and verify problem location accuracy before submission.

## DOWNLOAD COPY

Save and download an official copy of your filed complaint anytime.

## GPS LOCATION CAPTURE

Pinpoint the exact issue location automatically using device GPS.

## TRACK YOUR TICKET

View your raised complaint ticket and monitor its status in real time.

## GENERATE OFFICIAL EMAIL

Auto-generate a formatted email for direct government authority submission.

# AIRROUTE AI PATH PLANNER

**AIR QUALITY INTELLIGENCE** Finds the lowest-AQI path from source to destination in real time.

**LIVE ENVIRONMENTAL DATA** Integrates live air-quality readings and environmental conditions for routing.

**MULTI-MODE SUPPORT** Supports walking and cycling routes tailored to current AQI levels.

- Finds the cleanest AQI path from source to destination.
- Displays the selected clean-air route on an interactive map.
- Supports both walking and cycling travel modes.
- Uses live environmental data based on current time of day.

| COMPARATIVE ROUTE DIAGNOSTICS                                                                                                                                                                                                                  |                                                                                                                                                                                                                  |

# ECO3D MAP — CITIZEN TASK TRACKING

Citizens & groups earn reward points for completing verified urban tasks.

Photo Verifier confirms task completion with visual proof.

Real-time tracking of civic participation on the ECO3D digital twin map.

Measurable accountability fosters community engagement and transparency.

ECO3D Task Tracking turns civic responsibility into a rewarding, verifiable, and data-driven experience for every citizen.

**DIGITAL TWIN INFRASTRUCTURE :** Real-time GIS-based 3D model of Sadiq Nagar with spatially accurate urban mapping.

**SMART STREET NAMING :** Digitally named streets and precise geospatial layers for reliable urban monitoring.

# CARBONQUEST — PRACTICAL IMPLEMENTATION

CarbonQuest transforms climate action into a city-wide multiplayer competition — making sustainability visible, measurable, and genuinely rewarding for every citizen.

User check-ins via mobile app to log sustainable actions in real time.

GPS data integration for location-verified participation and route tracking.

Public transport API connection for automated commute-based scoring.

Scoring engine calculates impact points based on action type and frequency.

AI and photo verification of tasks ensures accountability and prevents fraud.

# REAL-WORLD IMPACT

## LOWER ENERGY COSTS

AI bill analysis reduces household electricity expenses with actionable savings insights.

## FASTER GOVERNANCE

Structured digital grievance filing accelerates civic issue resolution and government response.

## URBAN TRANSPARENCY

GIS digital twins and real-time data deliver accountable, visible city management.

## HEALTHIER MOBILITY

Live AQI-based route intelligence guides citizens toward cleaner walking and cycling paths.

## CITIZEN PARTICIPATION

Gamified sustainability drives measurable community engagement in carbon reduction.

## INCLUSIVE GROWTH

CityOS empowers every citizen with digital tools for a fairer, more efficient urban life.

# WHY CITYOS MATTERS

Not just tools — a connected urban intelligence platform.

Links AI, GIS, live tracking, and public participation.

Addresses real, everyday city challenges practically.

Aligns with inclusive and efficient urban life goals. CityOS brings together citizens, data, and AI into one cohesive ecosystem — making cities smarter, more responsive, and built for every resident.

# CITYOS

**SMART ENERGY · GOVERNANCE · MOBILITY · SUSTAINABILITY**

**CITYOS REIMAGINES URBAN LIVING THROUGH  
FOUR CONNECTED PILLARS – BRINGING  
CITIZENS, DATA, AND AI TOGETHER FOR A  
CLEANER, MORE RESPONSIVE, AND  
INTELLIGENT CITY ECOSYSTEM. FUTURE-  
READY. PEOPLE-FIRST. BUILT FOR TOMORROW.**

**MADE BY : PRAGUN AND ANUGRAH**
